

THE MANSON BOSS ANCHOR

THE BOSS, THE NEW ANCHORING AUTHORITY

THE BOSS IN TECHNOLOGY

- New Patented Shackle Preventor
- New Single Slot Shank
- Bow Roller Conformity
- Performance Winglets
- Piercing Tip

THE BOSS IN HOLDING POWER

Intelligent application of design has given the Boss a power house fluke. In house testing confirms that this anchor constantly exceeds the world's first official Super High Holding Power anchor, the Manson Supreme, by a factor of 20%.

THE BOSS IN SAFETY

No other anchor can deliver you such surety in every parameter, fast setting, super high holding power, versatility in use and high strength.

THE BOSS IN STRENGTH

Using the best materials, Llyod's approved 800mpa high tensile steel, great design and expert fabrication the Boss delivers you a super strong anchor.

THE BOSS IN PERFORMANCE

Winglet design performs a dual purpose, they facilitate the self righting of the anchor, immediately on connection with the sea floor, and

then cleverly assist in driving the fluke deeper achieving the ultimate holding power possible. Utilising the single slot with Shackle preventor system, the Boss is an anchor for all occasions and all sea bed types.

THE BOSS IN VALUE

Manson offers you a life time warranty on their anchors.

Amazing performance, amazing longevity = amazing value.

FACT!

In testing the 35lb MANSON BOSS held 4200kg. Testing had to be stopped as the 5/8" shackles were bending!!

THE MANSON BOSS
The safest, strongest, most efficient anchor we make

ANCHOR & CHAIN SIZE SELECTION GUIDE
